WORK EXPERIENCE

Reputation.com, Chicago, IL
2016 - Present

Web Developer

Develop and deploy fully responsive and interactive web pages, using HTML, CSS, JavaScript, and Mustache.js. Integrate pages with REST API's to build dynamic interfaces powered by JavaScript. Serve as a consultant to clients where I am in charge of scoping, implementing, and supporting change requests and bug fixes for web pages. Work cross-functionally with Product and Engineering in a junior capacity to ideate and engineer feature enhancements for our UI app using React.js. Design and maintain a library of pre-built templates that has cut development time by half.

Freelance, Chicago, IL
2015 - 2017

Web Developer

Provide WordPress and SquareSpace theme customizations, using HTML and CSS.
