## WORK EXPERIENCE

Reputation.com, Chicago, IL

2019 - Present

### Web Developer

Develop and deploy responsive, dynamic web pages using HTML, CSS, JavaScript, JSON and Mustache.js. Integrate with REST API's to build dynamic interfaces powered by JavaScript. Serve as a consultant to clients for scoping, implementing, and supporting web page change requests. Maintain a library of pre-built templates and components that has cut development time by half. Continuously streamline and document the web page development process. Work cross-functionally with Customer Success and Engineering to ensure cohesive end-to-end implementations.

2016 - 2019

### UI/UX Designer

In charge of implementing web page change requests, from designing wireframes and mockups to coding the final results.
